👤 Professional Summary

Full-Stack Developer with 13+ years of experience delivering scalable, secure, and user-friendly enterprise applications. Specialized in .NET (Core, MVC, Blazor, Razor, Web API), Angular/React, and accounting/payment integrations (Xero, QuickBooks, Stripe, etc.). Proven ability to lead development teams, architect cloud-native solutions on Azure, and deliver high-impact systems for clients across the U.S., Australia, and India.

🧠 Core Technical Skills

Languages & Frameworks: C#, .NET Core, ASP.NET MVC, Web API, Entity Framework

Frontend: Angular (v2-17), React, HTML5, CSS3, JavaScript, TypeScript, jQuery

Cloud & DevOps: Azure Functions, Azure Service Bus, CI/CD (GitHub Actions, Azure DevOps), AWS

Databases: SQL Server, MySQL, MongoDB

APIs & Integrations: Xero, QuickBooks, Zoho, Stripe, PayPal, BlueFolder, MYOB (Essentials & AccountRight), NAB, Pin Payments, Split Payments

Payment Gateways: PayPal, PinPayments, NAB Transact, Split Payments

Tools: Visual Studio, Git, Swagger, Postman, Fiddler

Architecture: Microservices, REST APIs, 3-Tier, Clean Architecture

Security: OAuth2, JWT, Duende IdentityServer, RBAC, IP/NDA compliance

🤖 AI & Automation Tools

OpenAI / GPT-4 / GPT-3.5: Integrated for AI-powered financial forecasting, automated chatbots, natural language financial report generation, and client query insights.

Perplexity AI: Used for fast contextual research, solution exploration, and workflow automation support.

GitHub Copilot: Assists in accelerating coding productivity, reducing boilerplate, and enforcing secure and consistent code patterns.

AI-powered PDF Generation: Automatically summarizes forecasts, billing insights, and chatbot transcripts for users.

SignalR + GPT: Combined with SignalR to provide real-time AI-powered insights in web applications.

Azure OpenAI Service: Integrated GPT models securely within enterprise infrastructure.

Key Projects

Fuse Dental

Stack: Angular 14, .NET Web API, Azure Functions, SignalR, SQL Server

Role: Tech Lead

URL: <https://test-fuse-web.practicemgmt-test.pattersondevops.com>

With Fuse, you can access all your practice and patient data anywhere you have an internet connection. The intuitive, cloud-based practice management system for dental practices allows you to consolidate multi-location practice data and processes in one place and add locations easily. Your team will experience simpler operational workflows that improve patient experience. Effortlessly unlock insights to improve processes and identify business opportunities.

It provides a configurable, web-based command center where you can manage accounting and finance tasks and processes. Utilizing a hierarchical task list, role-based workflow, and real-time dashboards, the task management product allows users to track and control a variety of task types.

Billpower – Branded Online Payment Page

Stack: ASP.NET, C#, Entity Framework, SQL Server, JavaScript, jQuery, AJAX

Role: Database Designer, Programmer

URL: <http://billpower.co/>

Developed a custom-branded payment platform that integrates with invoices, statements, and email communication. Features include automatic and partial payments, surcharging with auto-invoicing, mobile-friendly design, and support for multiple payment methods. Enabled automatic reconciliation, reduced manual data entry, and allowed integration with accounting platforms like Xero, QuickBooks, MYOB Essentials, and MYOB AccountRight. Supported multiple payment gateways including PinPayments, NAB Transact, PayPal, and Split Payments.

AccountsInSync – BlueFolder + Xero Integration

Stack: .NET Core, SQL Server, JavaScript

Role: Full Stack Developer

URL: <http://accountsinsync.com/bluefolder-xero/>

Bluefolder & Xero inSync by accountsinsync.com brings simple, automated invoicing and financial features to Bluefolder – field service made easy through a powerful integration with Xero – beautiful accounting software.

This delivers time-savings and provides you the information you need to make better business decisions – features usually limited to more complex and expensive systems. But now it's easy! You can [instantly send customers an invoice](#) from your Xero accounting software when you close tickets in Bluefolder.

Eleven Express – FMCG Grocery Platform

Stack: ASP.NET MVC, SQL Server, HTML/CSS, jQuery

Role: Full Stack Developer

URL: <http://www.eleven.express/>

This project is designed to take care of the special requirements of the FMCG and Packaged Goods business – manufacturers, traders, distributors, sub-distributors, C&F Agents etc. It is the only software tailored for the business and offers tremendous value to users.

TimeBox – Project Management Tool

Stack: ASP.NET, AngularJS, SQL Server

Role: Developer & Database Designer

URL: <http://spadez.timebox.cloud/>

It is an online project management tool that keeps your team and clients working together. The Dashboard gives a quick over-view of all your projects. It generates reports on which tasks you and your team have worked on in the past week, month, quarter or year. Automatically create a progress / Gantt chart for your entire team.

It provides a configurable, web-based command center where you can manage accounting and finance tasks and processes. Utilizing a hierarchical task list, role-based workflow, and real-time dashboards, the task management product allows users to track and control a variety of task types.

Best Innovators – Card & Inventory Management

Stack: ASP.NET MVC, SQL Server

Role: Developer

URL: <http://bsp.spadezgroup.com/>

Built a card recharge, inventory tracking, and discount management system for B2B/B2C shops.

ERP Solution of School Management & Institute

Stack: Vb.NET, Windows Desktop, SQL Server

Role: Developer

URL: Standalone Windows Desktop Application

This project includes various process of school which provides student's registration, their admissions, Fee Management, Daybook and cashbook, Attendance management, Examination system, Time-Table, Data rollover and customized graphical reporting. This is based on client/server architecture and role based security is provided.

Club Manager

Stack: .Net Core Web API & Angular, SQL Server

Role: Full Stack Developer

This Project handles the daily transactions Like Card Recharge, Restaurant Billing, Bar Billing, Stock, Sales and Purchase, Payroll, Coupon Management. It basically Facilitates to the members for making their Payments from their Pre-Paid Recharged Cards (Smart Cards) for using various services in the Clubs & Bar. Rather than making Payments at the end of the Month through Cheque or Cash.

Education

Master of Computer Applications (MCA) – Jaipur National University

B.Sc. in Information Technology – Punjab Technical University

*References, code samples, and case studies available on request. *

Availability & Engagement

- ✓ Open to hourly, milestone, and full-time contracts
- ✓ Available for U.S. time zone overlap
- ✓ NDA and IP compliance ready

✨ **Free Trial Offer:** I offer a 1-week (5 business days) free trial — real tasks, real delivery, no commitment until you're confident.
